Experiment No: 3.2

Student Name: Sachin Kumar Singh

UID: 21BCS9217

Branch: BE-CSE

Section/Group: 21BCS-CC-646 (B)

Semester: 6th

Date of Performance: 11/02/2024

Subject Name: Project Based Learning in Java with Lab

Subject Code: 21CSH-319

Aim: Create a program to create JSP application to demonstrate the expression tag by using mathematical operation.

Objective:

1. To learn about JSP tags.
2. To learn about how jsp works java.

Input/Apparatus Used: IntelliJ / VS Code.

Procedure/Algorithm/Pseudocode

1. Display the HTML form (index.jsp):

- a. Provide input fields for two numbers.
- b. Provide checkboxes for addition, subtraction, multiplication, and division operations.
- c. Set the "Addition" checkbox as checked by default.

2. Handle form submission (calculate.jsp):

- a. Retrieve values of num1, num2, and selected checkboxes.
- b. Use expression tags to perform selected mathematical operations:
 - If "Addition" checkbox is checked:
Display $\text{num1} + \text{num2}$.
 - If "Subtraction" checkbox is checked:
Display $\text{num1} - \text{num2}$.
 - If "Multiplication" checkbox is checked:
Display $\text{num1} * \text{num2}$.
 - If "Division" checkbox is checked:
 - i. Check if num2 is zero:
 - If yes, redirect to error.jsp.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

- If no, display num1 / num2.

3. Error Handling (error.jsp):

Display an error message indicating invalid data for division operation.

Code:

1. Index.jsp

```
<% @ page language="java" contentType="text/html; charset=UTF-8"
    pageEncoding="UTF-8"% >

<!DOCTYPE html>
